RIDERS (1682.)

British Merlin:

BEDECT WITH

Many delightful Varieties,

and useful Verities,

Fitting the Longitude and Latitude of all Capacities within the Islands of *Great Britains Monarchy.*

And Chronological Observations of Principal Note to this Year 1682.

Being the SECOND from

The *Bissextile* or *Leap-Year.*

WITH

NOTES of Husbandry,

PHYSICK, FAIRS, & MARTS

Directions and Tables to all necessary Uses.

Made and Compiled for the Benefit of his Country,

By *CARDANUS RIDERS*

LONDON: Printed by *Tho. Newcomb,* for the Company of Stationers, 1682.

Profitable Observations and Notes.

ALL Measures of Longitude are deduced from Barley Corns: Three Barley Corns make an Inch, Twelve Inches one Foot, Three Feet one Yard, Five Yards and an half one Statute-Pole, or Perch; Forty Perches make a Furlong, Eight Furlongs make an English Mile, in a Mile are Three hundred and twenty Perches or Poles, One thousand six hundred sixty six Paces: Ells, One thousand four hundred and Eight: Yards, One thousand seven hundred and sixty: Feet, Five thousand two hundred and Eighty: Inches Sixty three thousand three hundred and sixty; and Barley Corns, One hundred ninety thousand and eighty.

The Circumference of the Earth and Sea joyntly is 25036 Miles, and the Diameter 7966 Miles, and its Semidiameter 3983 Miles, according to English Mensuration.

The Dimensions of England, *and the adjacent Islands.*

THe Length of England from South to North is 38 Miles, the broadest place from the Lands end to Sandwich is 279 Miles; the next broadest place, which is between St. Davids and Yarmouth in the East, is 24 Miles; the whole compass of England is 1532 Miles.

The length of Ireland, North and South, is 303 Miles, the greatest breadth thereof, East and West, is 112 Miles, the whole compass of the main Land is 948 Miles.

The greatest length of Scotland, South and North, is 480 Miles; and the breadth East and West is 165 Miles, the whole compass 1100 Miles.

The Isle of Man is in length 28 Miles, the bredth 10 Miles, and in compass 91 Miles.

The Isle of Anglesey is in length 21 Miles, in bredth 12 Miles, in compass 85 Miles.

The Isle of Wight is in length 22 Miles, in bredth 12 Miles, in compass 57 miles.

The Isle of Garnsey is in length 13 Miles, in bredth 6 Miles, the whole circumference is 36 Miles.

The Isle of Jersey is in length 10 Miles, in bredth 6 Miles, in compass 28 miles.

Europe contains in it theſe Provinces, Germany, Sweedland, Denmark, Italy, Muſcovia, Hungaria, France, Spain, Polonia, Sclavonia, Norway, Grecia. The moſt eminent Iſlands are theſe, Great Britain, Ireland, Sardinia, Candia, Nigropont, and Corſica.

The greateſt length of this part of the World 3000 Miles, the bredth 900.

Aſia, the biggeſt of the four, and firſt known part of the World, contains theſe principal Regions and Iſlands, *viz.* Armenia, Anatolia, Perſia, Aſſyria, China, Syria, Arabia, Meſopotamia, India, Parthia, Media, Paleſtine, Chaldea, Tartaria.

In *Africa* are theſe provinces, *viz.* Ægypt, Barbary, Æthiopia, Nubia, Abaſſines, Alonomopa, Lybia. The Iſlands Magdagarde, St. Thomas, Inſula de Cape Verde, Inſula de Canaria, Inſula de Madera.

America, the fourth part of the World, and of the lateſt diſcovery, conſiſteth of theſe two parts, Mexicana and Peruana.

The Provinces of Mexicana are Nova Hiſpania, Terra Florida, Nova Albania, California, Norimbega, Nova Francia, Eſtetland. The chief Iſlands of Mexicana are Greenland, Heland and Frieſland.

The provinces of Peruana are Braſil, Paſal de Chibana, Peru de Carranen, Chila, Charon, Chico, Patagoes. The chief Iſlands of Peruana are Hiſpanniola, Cuba, Jamaica, and many others

The building of London 2789
The building of Rome 2434
The building of York 2674
The building of Cambridge by Sigisbert King of the East Angles 1982
Julius Cesar conquered this Island 1694
Alexander the Great began his Monarchy 2030
The Bible translated into Greek by the Seventy Interpreters at the command of Ptolemy Philadelphus 1947
Tamberlain the Scythian slew 200000 Turks, took Bajazet the Emperor, bound him in Fetters of Gold, and carried him about in an Iron Cage 285
Guy Earl of Warwick slew Colborn the Danish Giant near Winchester 1756
The Game of Chess devised 1330
Clocks and Dials first set up in Churches 1076
Glasing, and building with stone brought into England by Bennet a Monk 1017
St Pauls Church burnt 596
London Bridge new built of timber 511
London Bridge with thirty three years labour finished with stone 47

Since

Lon

London Bridge burnt 468
Tiling first used in London 435
A Frost from the midst of September till April 318
The first use of Guns 272
Hunting first used in England 242
Register-books in every Parish 144
The Sweating Sicknes 131
The first use of Coaches 127
The last firing of Pauls Steeple 120
A great Frost and sudden Thaw, which brake many Bridges 116
The Royal Exchange finished 109
A great Snow fell the 4th. of February 96
A Blasing Star in May 102
A great Plague, whereof died in one year in London 30578 79
Gunpowder-Treason, Nov. 5. 77
A great Snow 67
The River of Thames frozen, that people for many days walked over, and fires roasting Meat on the Thames 46
The last fire on London Bridge 50
A Blasing Star in December 39
The Rebel Parliament began November the Third, 1640 41
King Charles the Second His happy arrival at London, May 29. 1660 22
Two Comets seen in Dec. and March. 18
The sad Mortality that followed, whereof died of the Plague that were taken notice of, besides many others, 98596. 17
The most dreadful Fire in London, that followed them, Sept. 2, 3, 4, 5. 16

Beer

Deer Measures.						Ale Measures.					
Pints	288	144	72	8	4	2	256	128	64	8	4	2
Quarts	144	72	36	4	2	1	128	64	32	4	2	1
Pottles	72	36	18	2	1		64	32	16	2	1	
Gallons	36	18	9	1			32	16	8	1		
Firkin	4	2	1				4	2	1			
Kilderkin	2	1					2	1				
Barrel	1						1					

The Use of this Table is thus: There is contained in a Barrel 288 Pints, in the first row; in a Kilderkin 144 Pints; in a Firkin 72 Pints; in a Gallon 8 Pints; in a Pottle 4 Pints; in a Quart 2 Pints. Or thus, One Barrel is two Kilderkins, 4 Firkins 36 Gallons, 72 Pottles 144 Quarts, 288 Pints; and so of the rest, it being so easie as no further explanation.

Chief Notes of this Year, 1682.

English Acc.		Roman Acc.
11	Golden Number	11
1	Epact	2

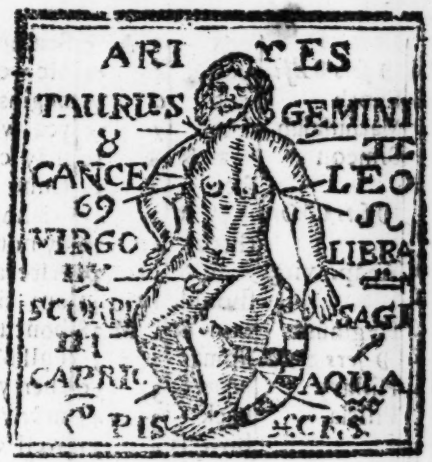
The



The Subsequent Diary Explained.

THE Year consisting vulgarly of twelve Moneths, is contained in twelve Pages. Each Moneth is divided into nine Columns, in the first of which is placed the Days of the Moneth.

In the second the Days of the Week, A being this Years Dominical Letter.

The third contains the Feasts Fixed and Moveable in a Planetary way, the beginning and end of the Terms, and the Suns Ingress into the Signs.

The fourth shews the Sign wherein the Moon is every day at Noon.

The fifth shews the Hour and Minute of High Water at London Bridge every day.

The sixth hath a Diary Judgment of the Weather.

The seventh on the Blank side is Sun Rising.

The eighth is Sun Setting every day in the year.

The ninth Notes of Husbandry and Physick.

January hath xxxi days.

This moneth cut, ſet, and lay Quickſets and Roſes, as all other Plants. Set and plant Vines, Hops, and all fruit that grows on buſhes. Sow Peaſe, Beans, and Onions; furniſh your Gardens with Salads and Pot-herbs for Summer. Prune and trim all ſorts of Fruit-trees from Moſs, Canker, and ſuperfluous branches. Remove Graffs or young Trees in the laſt quarter, the Moon being in *Aries*, *Libra*, or *Scorpio*.

If neceſſity urge you may let bloud, but be ſparing in Phyſic; and be ſure when a warm day comes to prevent taking of cold through careleſneſs; for the warm Air this moneth is not laſting, but oft deceives us to our prejudice.

In this moneth ſlimy Fiſh, Milk, and the like, that do opilate and ſtop the Liver and the Veins, and thicken the bloud, are to be eſchewed as Enemies to health.

March hath xxxi. days.

Now regarding the Wind and Weather, graft, cut Quickſets, cover the Roots of Fruit trees (opened in *December* and *January*) with fat Earth; ſow Oats, Barley, Parſnips, Onions, Carrots, Melons, Cucumbers, and all kind of Pot herbs; ſlip Artichokes and Sage, and ſow all manner of Garden-ſeeds.

Now adviſe with the honeſt & able Aſtrological Phyſician It is good to purge and let bloud, for in this moneth the humours and bloud increaſe, and groſs feeding breeds groſs bloud and humours; therefore uſe meats of good digeſtion, & ſuch as afford good juice and nutriment to the body. Forbear all things ſalt, purge the bloud by potions and bloudletting. Sweet meats and drinks are commendable. Be ſure to eat in the morning before you drink

This moneth ſow Hemp and Flax, pole Hops, ſet and ſow all kinds of Garden Herbs. Reſtore the liberty of the laborious Bee by opening her Hive. Bark Tree for Tanners; and let good Houſwives mind their Gardens, and begin to think of their Dairies.

In Gard'ning never this rule forget
To ſow dry, and ſet wet.

The uſe of Phyſic becomes now ſeaſonable, as alſo Purging and Bloud-letting. It is good to abſtain from Wine, for many diſeaſes will be taken thereby to the ruine of many.

This moneth the Pores of the body are open, and apt to receive Phyſic; therefore this is the beſt time to remove and prevent cauſes of ſickneſs, or for ſpeedy remedy in extremity. Pray to God for a bleſſing.

This moneth commmands the provident Housewife, and the prudent Artist, to set their Stills on work. In the beginning of the moneth sow and set those tender Somer Herbs that would not endure the former cold. Weed your Hop Gardens, cut off superfluous branches. Moss Trees and Gardens, and weed Corn. Rise early, and walk the Fields and Gardens. Now every Garden and Hedge affords thee Food and Physick. Rise early, walk the fields by running streams, the North and west sides. Sage and sweet Butter an excellent breakfast. Clarified Whay with Sage. Scurvy-grass-Ale, and Wormwood-beer, are wholesome Drinks. Green Whay excellent against Choler. Eat and drink betimes in the morning. Abstain from meats that are hot in Nature, and salt in Quality.

At the Full of the Moon, this moneth and next, gather your Herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish three or four days after the Full, and they will not run to seed. Shear your sheep the Moon increasing. Take heed of cutting Herbs or Flowers with a Knife, but rather gather them with your Fingers.

Let honest moderate labour and exercise procure your sweat. Use thin and light Diet, and chast thoughts tend to health. Lie not unadvisedly on the Ground, or overhastily drink.

Distilling of Roses and making of Syrups and Conserves, are now in prime. Use a light and thin Diet, for the Stomach is weaker now than in the former moneths. Clarified Whey boil'd with cold Herbs is very wholsome.

Get Rue, Wormwood, and Gall, to strew on your floors, to destroy Fleas. At the Full Moon gather flowers and seeds, dry your flowers rather in the shade then in the sun which too much exhaleth their vertue; but to avoid corruption, let the suns heat a little visit them.

Beware of violent heat, and sudden cold, which are the great distempers of this month, & produce pestilential diseases: forbear superfluous drinking, but eat hartily; use cold herbs and meats, abstain from Physick. Now Rivers are more wholesome then Baths. In time of Pestilence keep your Chamber windows shut, till the Sun have force of shining. Perfume your Chamber every morning with Tar, upon a chafing-dish of coals. Use *Cardus Benedictus* boiled, and drink fasting.

13	5 1	6 59	Beware of Physic and Bloudletting in the Dog-dayes, if the Air be hot; otherwise, it occasion require, you may lately make use thereof. Now moderate Diet is best; but beware of Surfets, Heats and Colds, for Plurisies are engendred thereby. Use not to sleep much, especially in the Afternoon, for that brings Opilations, Head-ach, Agues, and Catarrhs, and all notorious distempers of the same kind. Red Wine and Claret are excellent remedies for Children against the Worms.

The beginning of this month, and the end of the former gither Hops, their complexion being brown, and the weather fair, and no dew on the ground. Kill Bees, make Verjuice, remove and set all slips of Flowers between the two Lady days; remove Trees from *September* till *February*, especially in the new of the Moon. The weather warm, and the Wind South or West, cut Quicksets, gather ripe fruit, sow Wheat and Rye, Winter Parsnips and Carots; and set Roses, Strawberries, and Barberries.

Now as the year declines, provide your winter Garments, hang them on loosly, to prevent that you might after repent of. Good or Physick and Phlebotomy.

October hath xxxi. days.

Sow Wheat and Rie, remove young Plants and Trees about the New Moon; observing this as a seasonable Secret, that in setting you carefully place that side to the South and West, which were so before you took up the Plant: otherwise the cold kills it. Gather your remaining Winter Fruit, set all kinds of Nuts and Acorns, and cut Rose-trees but once in two years if you intend to have store of Roses.

The Garments you last month hung on your backs in jest, now button them close in good earnest. Cloath you now for prevention, for the cold comes insensibly, and Fogs oft-times beget a whole Winters cold. Consult with your Taylors as well as Physicians.

November hath xxx days.

Set Crab-tree stocks to graft on: In the old of the Moon, set Pease and Beans, and sow Parsnips and Carrots: Trench Gardens with dung, uncover the roots of your Apple-trees, and so let them remain till *March*: Kill Swine in or near the Full of the Moon, and the flesh will the better prove in the boiling.

The best Physick this month is good exercise, warmth, and wholesome meat and drink; but if any distemper afflict the body, finish your Physick this month, and rest till *March*, unless necessity urge: use good meat, and wholesome drinks to nourish the blood: be sure to go dry of your feet: for if not (unless it be those always used to it) be certain to be troubled with Rheums, and cold, and other inconveniencies attending.

In the last quarter of the Moon this moneth and the next, are the best times to fell Timber. Let Fowlers mind their game. Cover all your best Flowers and Herbs, from cold and storms, with rotten Horse-dung. Look well to thy Cattle; bloud Horses. Let a warm Fire and a Cup of Nectar be thy Bath, the Kitchen thy Apothecaries Shop, hot Meats and Broths thy Physic, and a well spred Table the proof of thy charity to thy poor Neighbours.

Advertisement.

In the last quarter of the Moon this moneth and the next, are the best times to fell Timber. Let Fowlers mind their game. Cover all your best Flowers and Herbs, from cold and storms, with rotten Horse-dung. Look well to thy Cattle; bloud Horses. Let a warm Fire and a Cup of Nectar be thy Bath, the Kitchen thy Apothecaries Shop, hot Meats and Broths thy Physic, and a well spred Table the proof of thy charity to thy poor Neighbours.

Advertisement.

Arts and Sciences Mathematical professed and taught, by *Henry Coley*, at his House, at the farther end of *Baldwins Court* in *Baldwins Gardens*, near *Greys-Inn Lane*, *viz.* Arithmetick, Geometry, Astronomy, Dialling, Navigation, the use of the Globes, Surveying of Land, Gaging, Measuring &c. Also the Art of Astrology in all its parts, According to the best *Authors*.

A Deſcription of the Four Quarters of the YEAR.

THe Spring-quarter begins this Year upon Friday *March* 10. near 3 in the Morning, at which time the *Sun* enters the Equinoctial Sign Aries, cauſing an equality of day and night all the habitable world over. *Summer* takes beginning upon *Trinity Sunday*, being the 11th. of *June*, at half an hour paſt 5 in the Morning, the *Sun* then approaching our Zenith, and enters the firſt ſcruple of the Tropical Sign Cancer, making longeſt days with us and ſhorteſt nights. *Autumn* or Harveſt-quarter, begins upon Tueſday, *September* 12, at 9 at Night and then the Sun touches the firſt Scruple of the Æquinoctial Sign Libra, which again equalizing both day and night. *Winter* begins Munday *December*. 11. at 51 min. paſt 8 in the morning; the Sun then touches the firſt point of the Tropical Sign Capricorn, making the ſhorteſt day and longeſt night in the Year, on this the Equator; as alſo the longeſt day and ſhorteſt night to them which inhabit the Southern part of the World.

Of the ECLIPSES *that happen this Year*, 1682.

THere will be only two Eclipſes of the Moon this Year, and thoſe total and at moſt Central, but there will be only one of them viſible to us in *England*. The firſt will be *February* the 11th, at half an hour paſt 11 at Night, this *Eclipſe* will be very great, and continue from the beginning to the end, near 3 hours and a half, Digets Eclipſed about 20, 'twill be worth the Obſervation of the Curious.

The *ſecond* will be upon the 8th day of *Auguſt*, at 6 in the Morning, and therefore will be Inviſible to us but to ſome parts of the Earth it will appear as great as the former.---- -There will be Three ſmall *Eclipſes* of the *Sun* alſo this year, but all Inviſible to us, and therefore I ſhall ſay no more of them.

A true and plain description of the High ways in *England* and *Wales*.

From London to Combridge 44 miles, thus accounted;
